Dodolivin Designs Half Moon Chair

I agree with **Dezona** in labeling this Half Moon wing chair as evocative of Batman chair and the credit for this goes to the extensive lines and extremely distinct [shades](#). But this is not all. It features skeleton-like seat, which is cushioned and the lively orange sponge rubber titivates the black coated wood boards of the armchair. The lounge and the buddy ottoman each offer a huge space to house dozens books, thereby helping you build your library ready with a collection that burns your stress. The designer chair was designed by **Louis Saul** and was exhibited for a first time at **IMM Cologne 2008** under his studio's tag **Dodolivin**.

Measurement:

Chair: 143 (H) x 125 (L) x 60 (W) cm

Ottoman: 49 (H) x 107 (L) x 51 (W) cm

BRD Simulator Pod: Mock Drive or Race at Ease

It's the latest in driving simulation and aims at making learning to drive as comfortable an experience as possible. "Simulator Pod", brought out by Bell Racing

Developments, as its makers put it, is simple to operate, handle and needs very little intervention. The simulator sports headphones for driver's flexibility, and also so that there is least noise trouble. It is PC operated, and has various racing software options. Of course, this is subject to licence approval.
