The magnificent **Half Moon** chair by **Louis Saul** was unveiled at the **imm Cologne 2008**.

The Half Moon is designed as a wing chair with built-in skeleton-like bright orange seat cushioning made from sponge rubber on top of black laminated wood boards. The avant-garde design and highly contrasting colours style strike a resemblance with the dark knight's style.

An added bonus is that both the armchair and the companion ottoman double as storage for about two dozens books providing an easy-access mini-library.
