## Batman's chair with mini library by Louis Saul

"The magnificent Half Moon chair by Louis Saul was unveiled at the imm Cologne 2008.

The Half Moon is designed as a wing chair with built-in skeleton-like bright orange seat cushioning made from sponge rubber on top of black laminated wood boards. The avant-garde design and highly contrasting colours style strike a resemblance with the dark knight's style.

An added bonus is that both the armchair and the companion ottoman double as storage for about two dozens books providing an easy-access mini-library. "
