

## the light at the end of the funnel

✦ Fashion, Green, Home, Unusual

📅 July 16th, 2008

Using everyday materials with a bit of LED technology and thinking ahead... Louis Saul of Dodolivin announces the oddly named "The Light at the End of the Funnel" entry as part of the "Enlightenment of the Month" series...

THE LIGHT AT THE END OF THE FUNNEL is one of the first single spotlights with High Power LED technology: That means only a fraction of the normal energy consumption, a long life span and nearly no heat development.

The Light at the End of the Funnel – dodolivin shows a plastic funnel in its correct light. This newest lamp idea he presents for the first time at Gdynia Design Days from 11th till 27th July 2008.

I seriously like it. I <3 Lamp.
